

Kip. Regional Park, with the assistance of Newsask Community Futures, is pleased to announce that we will have an improved recycling program operating at our lake this summer. In the past, three bottle drives have been done throughout the summer- however many recyclables were still scattered around the park or discarded into dumpsters. We will have two collection containers at strategic spots in the park, as well as a collection trailer near the dumpsters. With signage and public awareness this will improve the beauty of our park, and the environment. As a bonus, all recycling program proceeds will be used for future projects to improve and beautify Kipabiskau. Thank you, Newsask!
